

cleanup of the **Gowanus Canal**

Union Street Bridge Daily Closure Beginning March 14, 2022

3/1/22

Please be advised that the Union Street Bridge will be impassable to all roadway traffic between 9am and 2pm, for up to five days a week, beginning March 14th, 2022. The closures will be implemented on certain weekdays intermittently, based on the need to conduct specific construction activities.

This closure is necessary to facilitate work being conducted in the canal by the Gowanus Remediation Team (GRT). Setting the bridge span in the open position (closed to roadway traffic) will allow GRT workers to remove and stabilize target sediments from the canal bed, and install new electrical cables that are a part of the bridge's control system.

The daily closures will be implemented intermittently as needed until Fall 2022. The working hours of 9am to 2pm have been selected in order to minimize the inconvenience for pedestrians and motorists that will be unable to traverse the bridge while this work is in progress.

Please note that the Carroll Street Bridge is expected to remain closed to roadway traffic while this work on the Union Street Bridge is taking place.

For questions and concerns please reach out to the GRT at info@gowanussuperfund.com or call the hotline at (718) 403-2451.
